

Central & Inscribed Angles

Name: _____

Date: _____

Find x.

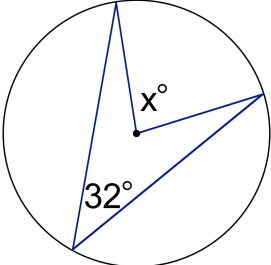

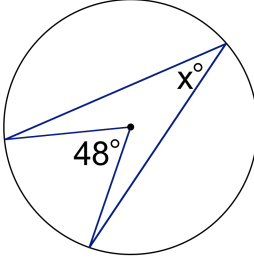

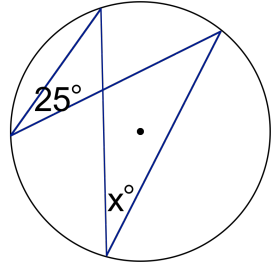

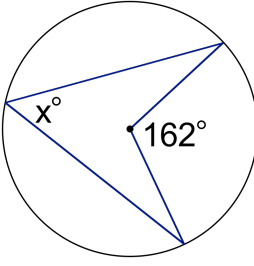

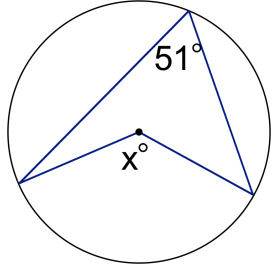

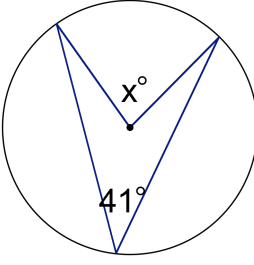

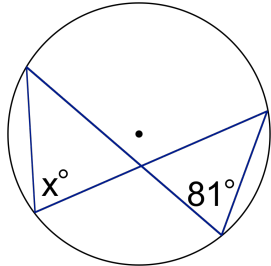

<p>1.</p>  <p>A circle with a central angle of 124° and an inscribed angle of x° subtending the same arc.</p>	<p>2.</p>  <p>A circle with an inscribed angle of 167° and a central angle of x° subtending the same arc.</p>
<p>3.</p>  <p>A circle with a central angle of 139° and an inscribed angle of x° subtending the same arc.</p>	<p>4.</p>  <p>A circle with an inscribed angle of 96° and a central angle of x° subtending the same arc.</p>
<p>5.</p>  <p>A circle with an inscribed angle of 78° and a central angle of x° subtending the same arc.</p>	<p>6.</p>  <p>A circle with an inscribed angle of 113° and a central angle of x° subtending the same arc.</p>
<p>7.</p>  <p>A circle with a central angle of 171° and an inscribed angle of x° subtending the same arc.</p>	<p>8.</p>  <p>A circle with an inscribed angle of x° subtending a semicircle, forming a right angle at the vertex.</p>

Central & Inscribed Angles (con't.)

Name: _____

Date: _____

Find x.
